SEED

We should like to build up our long history while stacking up each product like a pyramid that is made of bricks or stones neatly, carefully piled up one by one ...

Since 1915 we have produced over 2.5 billion pieces of plastic erasers. In the past, at present and in the future, we always strive to provide high quality, innovative products that will meet with all our customers' needs.

That is our commitment and goal.

1915

Today ❖ Osaka headquarters & factory

❖ SEED Vietnam Factory

ABOUT SEED:

The year was 1915. In Osaka-Japan, SEED CO., LTD. was established to manufacture and distribute to the world the erasers made from rubber.

Later in 1956 SEED was the first company to start producing erasers made from plastics – mainly from PVC, later polysulfide rubber, synthetic rubber, elastomer, and other compounds. Our well-known “Radar” Plastic Erasers sold over the past 55 years still remain the hallmark of our company as well as in the industry of plastic erasers.

In 1983 SEED invented the correction tape mechanism, having applied for its patent and patented it in 1984. We are virtually proud of the pioneer of correction tapes that are one of the best- and longtime seller stationery and office products worldwide.

In 2002 SEED established her own factory in Hanoi-Vietnam to produce and export high quality products made under so rigid Japanese QC system at competitive prices to Japan and other countries.

Our most serious goal is to manufacture and provide all the things related to erasing and meet with consumers’ erasing needs. SEED is also dedicated to working with the environment by recycled or environmentally-friendly products.

In recent time SEED is also totally committed to manufacturing other plastic products for hobby/craft market and home use as well. At SEED we guarantee you your total satisfaction.

OUR LONG HISTORY:

1915: The former company - Miki Kosaku Rubber Mfg. Co., Ltd. started up business.

1945: SEED started producing plastic erasers in addition to rubber erasers.

1968: Started producing “Radar” plastic erasers.

1977: Started producing Scented Rubber Clays.

1982: Started producing fancy, decorative erasers

In the same year our former President Mr. Shigeru Tamai invented the correction tape mechanism and patented it. Later the product virtually became an alternative to correction fluid.

Rubber Clay scented with cola

Rubber & Plastic Erasers produced in 1950s

Miki Kosaku Rubber Mfg. Co., Ltd. established in 1915

prototype of the first correction tape at that time

Fancy, decorative erasers

1984: SEED was officially approved and certified to be the factory to meet with JIS/Japan Industrial Standards. 

1997: Started producing one of the eco- and human-friendly products - recycled erasers, non-PVC erasers as well as PVC erasers but phthalate-free.

※Originally scallop shell fine power

PVC-free

1998: SEED was officially certified according to ISO 9001 (Quality Management System) and ISO 14001 (Environmental Management System) in 1999.

2003: SEED VIETNAM CO., LTD. was established.

2006: Started producing carving blocks made from PVC and Animal Balance Game Erasers (non-PVC) excellent for hobby/craft markets.

2015: Celebrated its 100th anniversary and enjoyed the anniversary event in Okinawa.

2018: To celebrate the 50th anniversary of our “Radar” Plastic Erasers production and market launch, we produced the limited edition products, such as 50-color sleeves erasers.

2019: SEED developed unique, innovative transparent - “Clear Radar” Plastic Erasers.

2020: In addition SEED developed ingenious color-changing - “SUN Radar” Plastic Erasers.

2021: SEED developed PVC-free Twist-style Erasers.

2022: SEED developed phthalate-free, latex-free “PUSHUKESHI” Easy-to-push and advance Erasers and economical, easy-to-use, solvent-free CE-Series Cleaning Erasers ideal for home use.

2023: Moved the headquarters + plant to 3-2-17, Katsube, Toyonaka-City, Osaka Pref., Japan.

6006 Rubber Eraser certified by JIS

Radars

“Radars” Plastic Erasers

USP1

Highest erasing capability

Offers 97% erasing rate tested by JEMA/
Japan Eraser Manufacturers Association

USP2

Long sales history over 50 years

Eraser Stamp "Horunavi" Easy-to-carve Stamping Block Sets

"Horunavi" is the newly coined term combining the Japanese word "Horu" (meaning "to carve") with "Navi" (shortened form of navigation). Stamping block made from PVC same as plastic eraser designed to cut with ease. Easy to know where you cut owing to double-layer construction - two-tone colored top + base. For hobby, art & craft.

- Before you begin make sure to wipe the surface of the eraser block with a kneaded eraser
- Lay the tracing paper over your design and trace around it with a pencil
- Flip the tracing paper over and place it on the eraser block then transfer your design by rubbing over it
- Next, use a cutter knife to cut around the design to a size that is easy to carve
- While placing a cutter point with a 45-degree angle or so, try to cut it outside following the outlined design
- Place a cutter point at a slant from a little bit outside of the outlined design to the inside
- Then with an art knife or a cutter, carefully begin carving along the lines that you traced
- Next, trim and remove unnecessary parts with a cutter while inserting the cutter blade from outside horizontally
- Adjust the shape
- Use the yellow cleaning kneaded eraser to remove any graphite shavings and dust off the surface
- Ink the finished stamp
- Try stamping on any paper to learn whether any unfinished part is left over or not

クリアほるナビ

“CLEAR HORUNAVI” Easy-to-carve Stamping Block

Originally translucent body will help you carve with ease

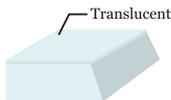

“Clear Horunavi” Stamping Block is a translucent eraser block that becomes transparent plus harder to crack, sturdier construction when it is heated after carved in an oven with temperature control function. Unlike the conventional white *Horunavi* Eraser Block, the cutting edge can be seen through the translucent dough and thus you can see precisely where you carve.

Colorful Plastic Clays

[Examples of work]

Shape and reshape again and again ...

The clay can be softened with hot water!!

How To Make

- 1** Prepare hot water at 80°C (176°F) in a heat-resistant container
- 2** Carefully place clay in hot water for 2-3 minutes until it is softened
- 3** When clay is softened, remove it from the hot water using chopsticks
- 4** While the clay is still warm, create your design
- 5** When your design is complete, put your clay in cold water to harden

Complete!!

- Ideal for decorative sweets
- Great for handmade decorations
- Perfect for making model clay figures
